Duo Pneuma

The entire work of nine movements was given the premiere in New York, Oct. 19, 2004, at The Church of the Holy Trinity and in Paris at L'Eglise Saint-Augustin. Oct. 26 and 28, and at the Cathedrale Notre-Dame (Oct. 30) during the World Conference on Evangelization.

THE MARILYN MASON ORGAN

For many years University of Michigan organ faculty and students expressed a strong desire for a baroque recital and teaching instrument that could most authentically serve the monumental compositions for organ by J. S. Bach and other early composers. Realization of this ideal instrument at last became possible through a generous gift from Judith Barnett Metz in honor of Marilyn Mason, with further substantial support from the officers of the University.

As a result of extensive research and consultation among members of the School of Music organ faculty and C. B. Fisk, Inc., of Gloucester, Massachusetts, it was decided that the instruments of Gottfried Silbermann (1683-1753) should be the models upon which the Marilyn Mason Organ would be based. Silbermann was a contemporary of Bach; in fact, Bach played upon many Silbermann organs and praised them.

The Marilyn Mason Organ does not replicate any single Silbermann instrument, of which there are twenty-eight extant, all but one in eastern Germany. Rather, it takes the best of what he offered in his medium-sized instruments and conforms perfectly to the aesthetic spirit and the mechanical capabilities of Silbermann's craftsmanship. The Marilyn Mason Organ most closely resembles the instrument built by Silbermann for the Georgenkirche in Rotha, Germany. It is number 87 in the Fisk series, which includes installations at Harvard, Stanford, and Yale.
